

UMAR HAYAT

Full Stack Developer

• umar.hayat.developer24@gmail.com • Lahore, Pakistan 54000 • (+92) 3204169730

PROFILE

Results-driven Full Stack Developer with **5+ years of experience** building scalable web applications using **Ruby on Rails, Node.js, React.js, and Vue.js**. Experienced in building scalable web applications, developing robust APIs, and creating responsive, user-friendly interfaces. Skilled in designing efficient back-end systems, integrating modern front-end technologies, and leveraging prompt engineering to enhance AI-powered workflows. Familiar with cloud platforms and DevOps practices, including CI/CD pipelines and deployment workflows. Committed to delivering clean, maintainable, and high-performance solutions that align with business goals and provide exceptional user experiences.

TECHNICAL EXPERTISE

- **Frontend:** Vue.js, React, JavaScript, HTML5, CSS3, Tailwind, Bootstrap
- **Backend:** Ruby on Rails, [Node.js](#), Express, Django
- **Database:** PostgreSQL, MySQL, MongoDB, Redis
- **Api & Payments:** RESTful APIs, GraphQL, Webhooks, Third-Party API Integrations, OpenAI APIs, OAuth 2.0, JWT Authentication, Stripe Connect, Paddle, Google APIs
- **Cloud & DevOps:** AWS, Docker, Kubernetes, Heroku, GitHub Actions, GitLab CI/CD
- **AI-Assisted Development:** Prompt Engineering, AI-Assisted Software Development, Code Generation & Optimization, Workflow Automation, ChatGPT, Claude, Cursor
- **Version Control & Tools:** Git, GitHub, GitLab, Jira, ClickUp, VS Code, Postman, Swagger/OpenAPI, Docker Desktop, npm, Yarn, Linux, Figma

PROFESSIONAL EXPERIENCE

STACK360

Lahore, Pakistan

Senior Software Engineer (Team Lead)

2022-2026

- Developed and maintained scalable web applications using Ruby on Rails/Node.js implementing robust back-end services, business logic, and RESTful APIs.
- Designed and optimized APIs, Databases, and microservices, improving performance, scalability, and security across distributed systems.
- Developed Real-time chat and notification systems using Action Cable in Ruby on Rails and WebSockets/Socket.IO in Node.js, enabling live messaging, event broadcasting, and real-time user interactions.
- Integrated Stripe Connect for multi-vendor SaaS platforms, enabling secure account onboarding, payment processing, payouts, and revenue-sharing workflows. Implemented Stripe webhooks to process real-time payment, subscription, and account events, ensuring reliable automation and data synchronization.
- Integrated AI-powered solutions through prompt engineering, enhancing workflow automation, conversational interfaces, and intelligent application features.
- Built dynamic and responsive user interfaces using React.js, Vue.js, JavaScript, HTML5, CSS3, Tailwind CSS, and Bootstrap.
- Integrated front-end applications with Rails and Node.js APIs to deliver seamless end-to-end functionality.
- Established and maintained CI/CD pipelines with automated deployment workflows, reducing manual errors and accelerating release cycles.
- Optimized application performance and improved load times through efficient coding practices, database tuning, caching strategies, and front-end optimization techniques.
- Collaborated directly with clients to gather requirements, define technical solutions, refine project scopes, and deliver results aligned with business objectives.

- Conducted code reviews, mentored developers, and promoted engineering best practices to improve code quality, maintainability, and team productivity.
- Collaborated closely with design teams to transform wireframes and mockups into responsive, user-friendly applications.

CODE EXPEDITION

Lahore, Pakistan

Software Engineer / Full Stack Developer

2020-2022

- Developed and maintained full-stack web applications using Ruby on Rails for backend development and modern frontend frameworks.
- Built and integrated RESTful APIs for web applications, ensuring secure and efficient data flow between systems.
- Designed and implemented responsive UI components using Vue.js.
- Worked on database design and management using PostgreSQL/MySQL, including schema design and query optimization.
- Collaborated with senior developers to implement new features, fix bugs, and improve application stability.
- Integrated third-party services such as authentication systems, payment gateways, and external APIs.
- Participated in Agile development processes including sprint planning, daily standups, and code reviews.
- Followed clean code practices and contributed to reusable, maintainable codebases.

PROJECTS

Habit Catalyst

- As the lead developer for "Coach Catalyst," I played a pivotal role in conceptualizing, designing, and implementing a comprehensive web and app-based accountability tool. Built and maintained scalable features using Ruby on Rails and Vue.js, improving communication, progress tracking, and client engagement.
- Designed and implemented multiple core modules, including a marketplace powered by Stripe Connect for seamless payments and coach-client transactions. Led the migration from Vue 2 to Vue 3, improving application performance, maintainability, and user experience. Integrated Zapier to automate workflows and streamline third-party system connectivity.
- Collaborated closely with cross-functional teams, contributed to architecture and technical decisions, and provided guidance to a team of developers to ensure timely delivery of high-quality solutions following best engineering practices.

Clicks

- Led the development and delivery of a SaaS platform, working directly with clients to gather requirements, define technical solutions, and oversee project execution from development through deployment. Designed and implemented multiple core features using Ruby on Rails, ensuring scalability and maintainability.
- Spearheaded the migration of the application's front end from ERB views to React, successfully delivering the transition within tight client deadlines. Integrated Paddle payment processing, enabling seamless subscription management and billing workflows. Established CI/CD pipelines using GitHub Actions and automated deployments to Heroku, improving release efficiency and reliability.
- Provided technical leadership, coordinated development efforts, and drove architecture decisions to deliver high-quality solutions aligned with business objectives.

autobuffy.com

- Developed and enhanced platform features using Ruby on Rails, including implementing new functionalities, fixing critical bugs, and improving system stability.
- Integrated payment gateway systems and implemented caching strategies to improve performance and reduce response times.
- Collaborated with the development team to deliver scalable, production-ready features aligned with business requirements.

cinekit.co

- Developed and launched a global camera equipment rental platform serving 100,000+ users worldwide, contributing to both backend and frontend development using Ruby on Rails.
- Improved platform design and user experience, while implementing new features and enhancing overall product functionality.
- Fixed multiple critical bugs and optimized application performance using Haml templating and efficient Rails architecture, resulting in faster and more maintainable code.

EDUCATION

BS Computer Science, Government College University

Lahore, Pakistan (2021)
